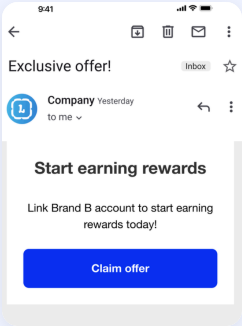
Unlock your customers' true buying patterns beyond your brand

Ario enables your customers to share item-level purchase history from any retailer — even competitors. Trade points, discounts, or VIP access for a consented data connection. Verified, SKU-level transactions flow into your CDP in seconds. No cookies, no fingerprinting, no data co-ops.

100+	SKU-Level	Seconds	1st Party
RETAILER CONNECTIONS	TRANSACTION GRANULARITY	NOT WEEKS	CONSENTED & DIRECT

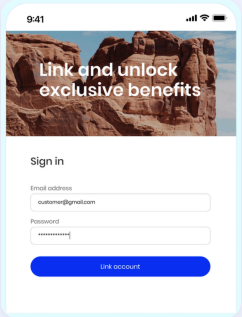
HOW IT WORKS

1. MAKE AN OFFER



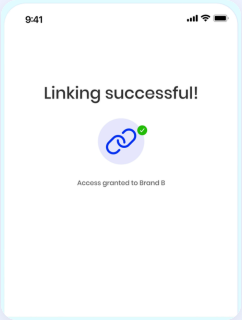
Trade points, discounts, or VIP access for a data connection

2. CUSTOMER LINKS ACCOUNT



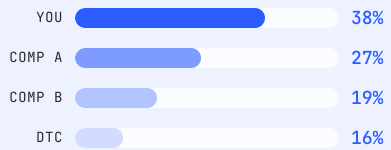
Customers log in to the requested account (100+ connections from Amazon to Zara)

3. DATA FLOWS IN



Verified transactions stream straight into your CRM or personalization engine

USE CASES

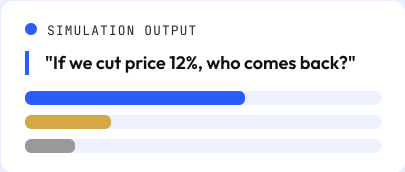


Customer Insights

Brand switching and competitive behavior grounded in verified purchases across retailers, not surveys.

Segment-of-One Marketing

A unified 1:1 view of every shopper. Personalized promotions and loyalty triggers based on what they actually buy everywhere.



Agentic Simulation

Digital twins built from real purchase data. Simulate pricing, competition, and launches before committing budget.

WHY ARIO

- **Shape Security team** — acquired by F5 for $1B. Built by cybersecurity veterans.
- **Not a data co-op.** Data flows directly from consumer to brand with explicit consent.
- **GDPR & CCPA compliant** with automatic data expiry. Enterprise-grade security.
- **Backed by Wing, BCV, Floodgate, and Moxxie Ventures.**
